

Update 07-22-16

The last few weeks have dramatically changed the look of the project as we near completion. Much of the erosion control was able to be removed and any erosion issues have been rectified. Final grading along the bike path and seeding have occurred. All of the "front yard" within the boulevard have been regraded, seeded and mulch and the grass is already beginning to fill in. Any watering the homeowners wish to supply will only help ensure a thicker stand of grass with less weeds. At this rate it may be only a few weeks before mowing will be needed. The City and County will complete mowing as to their schedule. If homeowners wish the boulevard to be kept similar to the rest of the yard the homeowner will need to mow more often.

We will be completing a final punch list for the contractor to complete next week. If you have any issues that you believe were missed you may contact Charlie Cherrier (612-919-9708) and he will review to see if the item warrants being added to the punch list.

We want to thank all of the residents for their patience and understanding through the entire project. Weather was mostly not on friend throughout the duration of the project.
